

“NEW” SR500PS Pool/Spa Combination Stingl Switch

The Model SR-500PS is specifically designed for Residential Pool/Spa combinations that share one common pump, and still provides the same reliable vacuum entrapment detection capabilities as the Model SR-500 Stingl Switch.

The SR-500PS is equipped with 2 “New Features”

- 2 Vacuum Memory Settings – One for the Pool, and One for the Spa
- Dry Contact input – for Total Automation used in conjunction with any remote system (such as Jandy RS)

Other Available Products:

- Emergency Stop Button
- Remote Audible and Visual Alarm
- Stingl Main Drain Safety Screws
- Drainsafe DS360 A112.19.8 Approved Anti-Entrapment Safety Drain Cover

DS360

WARNING

The Stingl SR-500 & SR-500SPS units are not designed to prevent hair, mechanical or evisceration entrapment

Pool Safety is our Top Priority

For general pool safety consider approved products such as:

- Anti-Entrapment Safety Drain Covers
- Perimeter Fencing
- Gate Safety Latches
- Gate Alarms
- Pool & Spa Covers
- Pool Alarms
- Secured Access points from Home Doors and Windows to Pool
- Posted Emergency Information
- Outside Telephone
- Rope & Float Line
- Lifering, Shepherds Crook (Hook)

Pool Safety is our Top Priority

Protect Your Family, Friends, Patrons & Guests

Make Your Pool and Spa Safer with the Stingl Model SR-500 & SR-500PS

The Stingl SR-500 and SR-500PS Reduces the Risk of Suction Entrapment Drowning

A Swimming Pool or Spa circulation system creates a suction force at the outlet where the water leaves the pool or spa (usually the main drain.)

Public Pool Requirements under the Federal Swimming Pool and Spa Drain Cover Standard

Effective One Year after the date of enactment, each public pool and spa must be equipped with anti-entrapment drain cover that conforms to the AMSE/ANSI A112.19.8 performance standard.

Each public pool and spa with a single main drain (other than an unblockable drain) must also be equipped with a device or system designed to prevent entrapment, such as a safety vacuum release system, that conforms to the ASME/ASNI A 112.19,17 performance standard.

- ACCORDING TO SAFE KIDS WORLDWIDE

The Stingl SR-500 and SR-500PS, a Safety Vacuum Release System (SVRS), has been designed to terminate pump operation in the event of a potential body or limb entrapment caused by suction entrapment. The Stingl SR-500 and SR-500PS are now available for installation by your Swimming Pool and Spa Professional.
